

Future Plans and Information

The Solihull Arden Club has recently had a complete site survey conducted on our campus which will now enable an Architect to design some detailed plans for the club.

These plans will look to develop the Site Security, Sauna & Steam Room Logistics, Increased Car Parking, Additional Padel Court, Orangery and options to further develop under-utilized areas.

Once completed these visuals and details will be shared with our members in the reception on display boards for everyone to see and feedback.

Smaller projects happening in the coming months will be the modernization of the Ladies and Gents changing rooms, addressing the acoustic concerns in the bar, developing the grounds and Padel court surrounding area.

Our annual squash court maintenance is scheduled to start on Monday 12 August 2024 for 4 days, courts will still available during this period.

Work will also be starting on the installation on the new LED floodlights on Tennis Courts 4 – 7 over the coming months so apologies for any noise or disruption this may cause.

England Squash Membership

England Squash Membership is changing

England Squash Membership is changing on 19 August to better connect players, coaches and clubs, and unite the squash community.

The new scheme will provide a flexible and accessible gateway to squash that will support the game to thrive, allow more people to discover the game of their lives and enable more people to feel part of our unique community.

So what's changing?

Currently, your England Squash player membership is paid by the club which is affiliated to England Squash. From August, player membership and club affiliation will be split which means you will need to purchase your player membership directly from England Squash if required.
